ABOUT US

Formed by a dedicated team with over 20 years of accumulated experience and based on an ISO13485 factory, Simple Medical is a manufacturer located in southern China, focused on research, development, production, and sales of orthopedic braces.

Our state-of-the-art rehabilitation products line, typically represented by our SIMPLE brand, is featured in the lightweight human engineering design concept, better liability and user experience, exquisite craftsmanship, supplied as higher-end China-made braces to the global market. The complete product series covers the overall body joints, including OA solutions, and injury solutions for upper and lower extremities and spine.

In China, we also distribute physical therapy and sports therapy products from international trusted brands, helping domestic patients with more comprehensive solutions in the field of orthopedic rehabilitation.

Our goal is simple:

To supply bracing products with reliable quality and efficient service, help our distributors boost their market, and enable end-users to restore their daily life.

Towards the goal, our excellent R&D team put sufficient innovations and tests into each product to ensure its liability with proven better results. Our production team keeps pushing the boundary of quality to a higher level.

History

- | | | |
|------|-----------|---|
| 2006 | Hong Kong | R&D and sale of Medical device accessories. |
| 2009 | Shenzhen | R&D, manufacture and sale of Medical devices in China Mainland. |
| 2011 | Dongguan | Extend production base for Orthopedic braces to 10,000 square meters. |
| 2012 | China | Start to set up sports medicine clinical training bases and product development with hospitals. |
| 2016 | Shenzhen | Official authorization of SIMPLE trademark. |
| 2017 | Nanjing | Establishment of Domestic marketing center. |
| 2019 | China | Council Member of China Association of Assistive Products. |
| 2020 | Dongguan | Startup of a 30,000 square meters Simple Medical Industrial Park. |
| 2020 | China | Rated as one of the National High-tech Enterprise |

+ OA SOLUTIONS

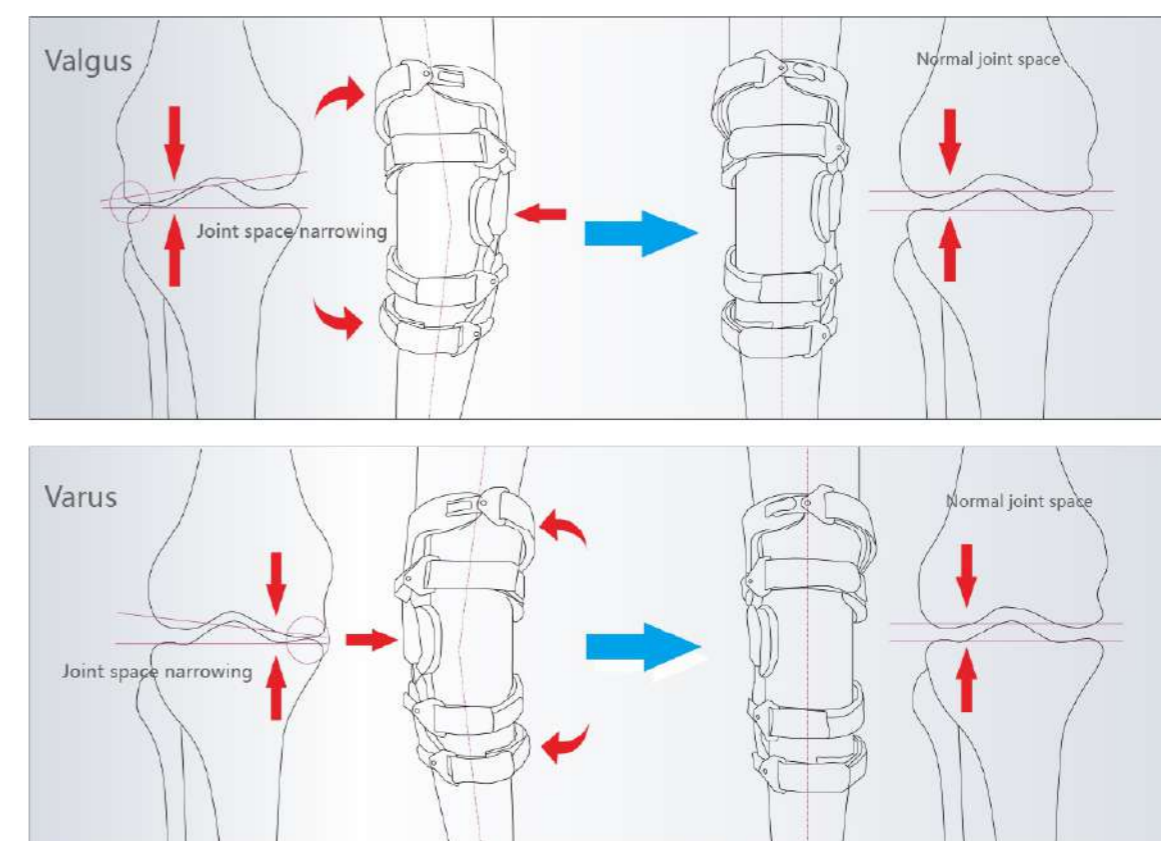

Osteoarthritis(OA) is the most common form of arthritis. Some people call it a degenerative joint disease or “wear and tear” arthritis. It occurs most frequently in the knees, as the knee joint is an important support column of the human body, bearing 70% of the weight of the upper body.

With OA, the cartilage within a joint begins to break down and the underlying bone begins to change. These changes usually develop slowly and get worse over time.

OA can cause pain, stiffness, and swelling. In some cases, it also causes reduced function and disability. Some people are no longer able to do daily tasks or work.

Earlier treatment intervention may improve the odds of preserving joint integrity and function for years, or even a lifetime, which can stave off debilitating pain and the possible need for joint replacement surgery.

Simple Medical has a series of OA knee braces, to help manage OA and improve the quality of life.

SIMPLE OA KNEE BRACE S1

LOW PROFILE • SUPERIOR QUALITY • LIGHT WEIGHT

FEATURES

- Aerospace-grade aluminum & High-tenacity polymer frame
- Comfortable pads with non-slip
- Adjustable range of motion
 - extension: 0°, 5°, 15°, 20°,and 25°
 - flexion: 0°, 30°, 45°, 60°, 75°,and 90°
- Unique varus/valgus angle adjustment, range +/- 40°

INDICATIONS

- Mild to moderate unicompartmental knee osteoarthritis
- Medial or lateral compartment
- Post-surgery cartilage or meniscus treatments
- Stabilization of ligament

SIMPLE

• INJURY SOLUTIONS

Orthopedic injury is one of the major issues in injuries.

It can be caused by various causes, such as overload sports, improper way of exercise, overweight, accidents, arthritis, etc.

Many complications come with orthopedic injuries: pains, weakness, decreased range of motion and flexibility, and reduced strength.

Without proper treatments, it leads to the inability to perform functional, vocational, and recreational activities.

Simple Medical offers a full range of orthopedic braces and supports for orthopedic injuries.

Featured with clean design, specialized materials, superior quality, and fair prices for our distributors.

Our products help increase stability, enable activity, provide comfort and reinforcement, relieve pains, and effectively contribute to rehabilitation from injuries.

Knee

SIMPLE KNEE BRACE H4 PCL

LOW PROFILE • SUPERIOR QUALITY

Before
Instability of the knee
following rupture of the
posterior cruciate ligament

After
Posterior support plate
holds tibia in the desired
position

SIMPLE KNEE BRACE H4 PCL is a clinically validated product that is typically used for the treatment of posterior cruciate ligament (PCL) injuries and postoperative rehabilitation.

Posterior support plate
Correct and stabilize tibia position
Comfortable non-slip padding

Double side knob design
Precise adjustment and easy
operation to suit each patient

Double-axis hinge
Conforms to the trajectory
of the knee joint for a secure
fit and easy wearing

Adjustable range of motion
Accurately control flexion and extension angle
-Extension: 0°, 5°, 15°, 20°, and 25°
-Flexion: 0°, 30°, 45°, 60°, 75°, and 90°

One-step closure system
Quick donning and easy removal

SIMPLE PCL Brace —
Stabilize the PCL and precise knob adjustments.

Ensure optimal care for your posterior cruciate ligament patients with the innovative SIMPLE PCL dynamic knee brace. The PCL protection pad securely holds the tibia in the desired position, providing exceptional stability and support. With the convenient tensioning dial, you can easily achieve fast and precise adjustment tailored to each patient's unique needs.

SIMPLE PREMIUM POST-OP KNEE BRACE K1

LIGHT WEIGHT • EASY FIT • MULTI-ADJUSTABILITY

INDICATIONS

- ACL, PCL, MCL, LCL repairs/injuries
- Tibial plateau fractures
- Meniscal repairs
- Osteochondral repairs
- Patella tendon repairs
- Condylar fractures
- Sprains/strains of the knee
- HTOs (High Tibial Osteotomy)

New design, appearance upgrade

One-step Locking System:
Visualized Tick-Mark,
Easy push buttons, with sliding lock modules
for precise adjustment and easy application.

Comfortable to wear

Adopt more comfortable anti-slip pads
to enhance the wearing experience.

Flexible slider design

Composed of four independent sliding
lock modules, independent of each
other, non-interfering with each other,
flexible adjustment.

One-step closure system

A quick buckle design allows the straps
to be easily and quickly fastened and
removed with one touch.

FEATURES

- Broader adjustable Range of Motion
10°~90° extension range
0°~120° flexion range
- Telescoping hinge lengths between
18.3~27.2"(46.6~68.9cm) to fit most patients
- Trimmable straps for size customization

3D Printing Medical

3D printing technology can truly realize personalized manufacturing according to the characteristics and requirements of patients, and become a powerful means to assist precision medicine.

With the advancement of 3D printing technology, it has been widely used and clinically practiced in the medical field, especially in medical fields such as scoliosis, joint fixation brace customization, and surgical guides. This allows more patients to receive effective treatment and rehabilitation assistance.
